1. Introduction

Thank you for your interest to our product.

Feed Reader Pro (Abbreviation: **FRP**) is the Question2Answer (Abbreviation: **Q2A**) plugin. This plugin analyzes feed information of external site. Analyzed information is rebuilt to HTML with template system. You can display feed information in the favorite place with widget, page and layer system of Q2A. Because analyzed feed data is stored to the file or database with dual cache feature, you can display information very fast. In particular, we recommend this plugin to the blog user. Plugin is made in accordance with the plugin making manner of Q2A. Therefore, you can upgrade Q2A in comfort. The convenience of all the people related to Q2A improves, and I hope Q2A system is recognized from people in the world.

Strict observance

This plugin isn't Q2A official product. Because other Q2A users are annoyed very much, you never post question and inquiry about this plugin to Q2A official site. Please post question and inquiry to lower site by all means.

Disclaimers

You should know specialized knowledge (RSS / Atom Feed, Server tuning, etc) to operate this plugin definitely. Therefore, I don't accept objection about performance and general technical question to have nothing to do with this plugin directly except program bug. If plugin don't work well, you have to use tech supporting service of ASKIVE (Payment is necessary).
