1. Introduction

Thank you for your interest to our product.

MASS MAILING PRO (Abbreviation:**MMP**) is the helper plugin of Question2Answer (Abbreviation:**Q2A**) standard mass mailing system. This plugin is armed by Ajax and CRUD-GUI. Q2A has feature for saving and editing one template. This plugin can save the data of email endlessly. You can save the data in two kinds (draft and back number). Of course you can show the data which you saved as back number to registered user or public. If you inform nothing from site, registered user becomes non-active user. Because mass email is useful to prevent this, you should use more. In particular, we recommend this plugin to the owner who have closed site. Plugin is made in accordance with the plugin making manner of Q2A. Therefore, you can upgrade Q2A in comfort. The convenience of all the people related to Q2A improves, and I hope Q2A system is recognized from people in the world.

Strict observance

This plugin isn't Q2A official product. Because other Q2A users are annoyed very much, you never post question and inquiry about this plugin to Q2A official site. Please post question and inquiry to lower site by all means.
